# Pacelab RNA Windows App Allows Users to Easily Analyze and Compare the Technical and Operational Performance of Passenger Aircraft
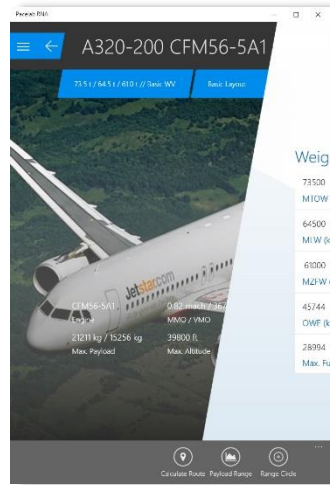

WINDOWS APP BUILDER PROFILE: PACE AEROSPACE

Picking the right aircraft for operation on a specific route involves complex trade-offs between aircraft configurations, maximum flight distance and passenger and cargo payload capacity. Pacelab RNA for Windows enables objective performance benchmarks, which support manufacturers' marketing campaigns and airlines' strategic fleet planning.
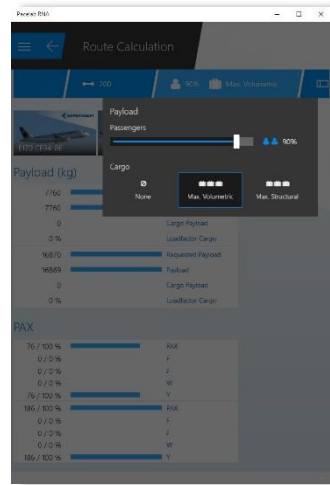

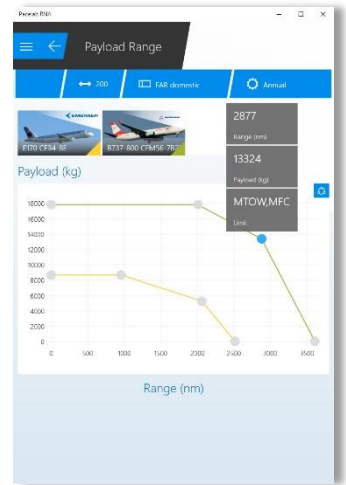

WHAT WE OFFER

Pacelab RNA delivers highly reliable projections of aircraft performance on a given route and helps you understand the strengths and limitations of alternative aircraft options. This makes Pacelab RNA both a powerful sales tool and an invaluable decision aid for operators seeking to expand or reallocate their fleets.

You can choose up to three aircraft for comparison from Pacelab RNA's comprehensive aircraft library. Your analysis can focus on different model versions, competitor products or both. To make the selection process easier, you can add aircraft and cabin photos, videos, technical specifications and other documents.

With just a few taps and swipes you can set up realistic operational scenarios in which to benchmark the selected aircraft. Operational scenarios consist of routes (e.g., departure and destination airports), passenger and cargo load, meteorological conditions and relevant international fuel-reserve regulations.

Pacelab RNA delivers key decision factors such as trip fuel, takeoff weight and maximum payload in easy-to-interpret, interactive graphs and tables. You can quickly share payload-range curves and maximum range circles with clients and team members via the Windows Share feature or copy them to other applications.

WHAT THE EXPERTS ARE SAYING

"With strong collaborative capabilities Pacelab RNA supports aircraft manufacturers and airlines in establishing a level playing field for aircraft evaluation." – Paul Clark, author of standard fleet planning textbook "Buying The Big Jets."

Microsoft | Go-To-Market Services

Windows

Windows is Microsoft's premier operating system, designed to help you manage your devices, apps, and identities in a way that scales up or down with your needs, so your business can grow efficiently.

KEY USE CASES

MOBILE POINT OF SALE
Windows 10 is the right platform to build the intelligent devices you need. Easily enable a mobile point of sale and create the internet of your things.

SEAMLESS 2-IN-1 EXPERIENCE
Run in desktop or tablet mode on 2-in-1 devices, seamlessly switching between type and touch inputs.

SINGLE SIGN-ON
Need to provide simple access to a multitude of devices? Use a single MDM solution to manage your team's devices. Or, use one log-in across Windows, OneDrive, and Office 365 with Azure AD join.

COLLABORATE AND SHARE
Windows 10 makes it easy to take notes in Microsoft Edge, and it also enables integration with additional devices. Whether you're using a virtual whiteboard or a smart TV powered by Windows, you can collaborate and share notes, files, and more.

PROTECTION FROM MODERN SECURITY THREATS
Enterprise security threats are on the rise. Windows 10 delivers entirely new ways to protect your systems and data. With features like Windows Hello and Microsoft Passport, we make it easier to adopt biometrics and multi-factor authentication. Windows 10 also has built-in defenses to help protect your critical business information from leaks or theft, while separating corporate from personal files.

CONTINUOUS INNOVATION
Now you can deploy and manage Windows more efficiently, and receive the latest innovations faster. Through the Current Branch for Business deployment schedule and the new Windows Update for Business service, you have the flexibility you've been looking for. Together these help reduce management costs, provide controls over update deployment, and offer fast access to security updates from Microsoft on an ongoing basis.

PRODUCTIVITY YOUR TEAM WILL LOVE
Windows 10 is familiar, and better than ever. With welcome similarities to Windows 7, including the Start menu, your team will feel like experts right away. New features like Continuum and Microsoft Edge provide new, innovative productivity experiences only available on Windows 10.

INNOVATIVE DEVICES FOR YOUR BUSINESS
With Windows 10, you can choose from a compelling lineup of business-ready devices, delivering innovations like hardware-based security, touch and pen input, and new, 2-in-1 devices.
